

ADVANTAGES

- Excellent energy performance
- Improved filter life
- Vertically integrated cartridge for better dust release and ease of removal and installation
- High filtration efficiency

Comment

Tenkey filter cartridges are available in two different lines of filter media. The HemiPleat version is manufactured of cellulose/paper media using Camfil’s patented Hemipleat Technology, the Dura-Pleat version is made of more durable spunbond/synthetic media to provide properties for more challenging applications.

The Tenkey HemiPleat™ filters for turbomachinery provide enhanced performance and longer service life, thanks to greater media utilization and more effective filtration. The HemiPleat™ separator bead opens up the pleats uniformly, allowing more effective cleaning, low pressure drop and long life.

Energy Consumption, kWh/year: Calculated according to Eurovent Guideline 4/21-2019
Energy class: according to Eurovent RS 4/C/001-2019
